

FRONT END DEVELOPER

James Bekis

PROFILE

As a Salesforce Commerce Cloud front-end developer with a strong emphasis on writing clean code and adhering to industry best practices, I am passionate about client satisfaction and actively seek to understand their challenges and provide effective solutions. I possess extensive knowledge of the Salesforce Commerce Cloud architecture and have dedicated the past ten years to front-end development. Furthermore, I am proficient in React.js and am adaptable enough to transition to this framework when necessary.

EXPERIENCE

TECHNICAL ARCHITECT, FENOM/VML; REMOTE, ONTARIO, CA – 2022-2024

- ◇ Served as a team lead on multiple projects, managing sprint branches, deploying code to test environments, and executing deployments and releases. Additionally, I created release notes and deployment steps, conducted code reviews, and provided guidance to the team.
- ◇ Led the front-end development team throughout the development cycles, providing developers with guidance and troubleshooting procedures.
- ◇ Orchestrated the development team in crafting a React.js accelerator integrated within the Storefront Reference Architecture of Salesforce Commerce Cloud, a task that had not been undertaken previously.
- ◇ Led the development team in creating the Storefront Reference Architecture accelerator, with a specific focus on developing reusable and customizable page designer components.
- ◇ Utilized Page Designer, a configurable content management tool within Salesforce Commerce cloud, to construct a configurable blog cartridge.
- ◇ Conducted numerous site analyses for clients to identify areas for enhancement regarding site speed, usability, and common development practices.
- ◇ With extensive knowledge of Business Manager, the control center for managing all aspects of an online store within Salesforce Commerce Cloud, assisted in merchandising products and configuration for launch on limited-time events for clients, assisted in scheduling and troubleshooting campaigns.
- ◇ Developed and refined templates for product landing pages associated with limited-time events.

FRONT END ARCHITECT, LIVEAREA/MERKLE; REMOTE, ONTARIO, CA – 2021-2022

- ◇ Developed highly functional, user-friendly, customizable, and reusable templates for page design.
- ◇ Served as a team lead on multiple projects, managing sprint branches, deploying code to test environments, and executing deployments and releases. Additionally, I created release notes and deployment steps, conducted code reviews, and provided guidance to the team.
- ◇ Responsible for developing initial deployment scripts for new Storefront Reference Architecture websites.
- ◇ Collaborated with the development team to establish an Storefront Reference Architecture accelerator, accompanied by a comprehensive style guide that outlines the appropriate locations and guidelines for customizations.

FRONT END DEVELOPER, HOT TOPIC, CITY OF INDUSTRY, CA – 2018-2021

- ◇ Responsible for implementing responsive images on the product detail page and product landing page platforms.
- ◇ Responsible for converting product detail page from Salesforce Commerce Cloud pipelines to controllers.
- ◇ Contributed to the restructuring of CSS style sheets to adhere to the Block element modifier format, thereby reducing page size and minimizing visual clutter.
- ◇ Contributed to the development of deployment scripts that minimize page size and enhance website load speeds through minification techniques.
- ◇ Documented deployment procedures and associated notes for production deployments of sprint releases.
- ◇ Responsible for deploying code to test environments using Bitbucket as JIRA tickets become ready for testing.
- ◇ Responsible for creating new sprint branches at the commencement of each sprint cycle.

FRONT END DEVELOPER, LUCKY BRAND JEANS; LOS ANGELES, CA – 2015-2018

- ◇ Utilized HTML, CSS, and tables to compose email newsletters.
- ◇ Responsible for developing, testing, and scheduling site refreshes for the Homepage, product detail page, and product landing pages.
- ◇ Developed reusable HTML, CSS, and JavaScript layouts for campaign-specific standalone pages.
- ◇ Installed the new BlogLink cartridge from the Salesforce Commerce Cloud cartridge store.

- ◇ Responsible for monitoring and troubleshooting order failures in the order flow process.
- ◇ Responsible for updating product marketing copy within the NetSuite platform.
- ◇ Responsible for establishing the connection between NetSuite and Salesforce Commerce Cloud for the retrieval of product information data.
- ◇ Lead the product team responsible for the release of the “Buy Online, Pick Up In-Store” feature for the web platform.
